EDUCATION

BS Intelligent Systems & Robotics

The Islamia University of Bahawalpur

Oct 2021 – Jul 2025

CGPA 3.50 / 4.00

AI · Machine Learning · Computer Vision

SKILLS

LANGUAGES

Python · C++ · SQL

AI / ML

LLMs · RAG · Computer Vision · LLM Agents · Machine Learning · Deep Learning · NLP · Transformers

FRAMEWORKS

PyTorch · OpenCV · Hugging Face · TensorFlow · Scikit-Learn · LangChain · Ollama · FastAPI · Flask · Streamlit

MODELS & LIBRARIES

Sentence-Transformers · faster-whisper · DeepFace · dlib / face_recognition · BeautifulSoup

DATA & CLOUD

FAISS · ChromaDB · Firebase · Azure AI Services · Azure Functions · Document Intelligence

PROFILE

AI/ML engineer who turns ideas into **working systems** — private RAG over your own documents, a website chatbot that turns visitors into CRM leads, an LLM-agent voice assistant, and real-time face recognition. Hands-on with Python, PyTorch, LangChain, OpenCV and Hugging Face, and comfortable taking a project end to end, from the first prototype to something people can install and use. Ready to bring that mindset to a junior AI/ML role.

PROJECTS

DocuChat — Local RAG Document Q&A

LLM · NLP

FastAPI · FAISS · MiniLM · TinyLlama · Ollama · Streamlit

github.com/chnaumankamboh/docuchat-local-rag

- Fully local RAG app: users upload PDF, DOCX or TXT in a FastAPI web UI and get sourced answers from MiniLM + FAISS retrieval.
- Found TinyLlama (1.1B) contradicting its retrieved context and made generation swappable; llama3.2:3b via Ollama got the tests right.

RAG Website Chatbot — Lead Capture

LLM · NLP

Flask · scikit-learn · Ollama · BeautifulSoup · HubSpot · Zoho

github.com/chnaumankamboh/rag-website-chatbot

- Answers visitors from the site's own pages: a crawler and follow-up-aware TF-IDF retrieval feed a local llama3.2:3b, with live index rebuilds.
- Keyword filter + few-shot LLM intent classifier opens a lead form; leads go to SQLite, email, HubSpot and Zoho, behind per-IP rate limits.

UniAttend — Face-Recognition Attendance

Computer Vision

Python · OpenCV · dlib · DeepFace · Firebase · CustomTkinter

github.com/chnaumankamboh/uniattend-face-attendance

- Recognises students from a live webcam with 128-d dlib face encodings, detecting faces on downscaled frames to suit low-cost hardware.
- DeepFace expressions, Firebase attendance with per-class Excel reports, salted PBKDF2 logins, and a Windows installer.

Jarvis — LLM Voice Assistant

LLM Agents

Python · faster-whisper · Ollama · Claude API · Tool calling

github.com/chnaumankamboh/jarvis-voice-assistant

- Local faster-whisper speech-to-text with voice-activity filtering, an LLM agent that calls tools (web, files, weather, news), and offline TTS.
- One tool registry shared by two swappable brains (local Ollama or the Claude API), with a capped tool loop and trimmed history.
